

PSX-R₂ Instant sonic upgrade for many Cyrus components

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

PSX-R₂ provides an extremely smooth and stable DC feed allowing any partnered component to achieve its full potential. Perceive new levels of fine detail, the PSX-R₂ allows you to comprehend subtle emotional nuances that expose the performer's emotion and passion. These elements are always captured in the recording but unresolved until the system is able to discern a higher level of detail.

A stable, strong and separated power supply can provide huge sound quality benefits for a hi-fi system.

PSX-R₂ features and benefits

Re-designing A Classic:

The PSX-R₂ is based on a design that has been in the Cyrus family for over 30 years. The latest improvements bring power supply filtering from the latest generation of Cyrus amplifiers, culminating in the new v2 edition.

Instant Upgradability:

The PSX-R₂ provides an instant sonic improvement to any compatible product. The benefits of a separate, isolated and highly regulated power supply allow internal electronics to upgrade their sonic performance.

Intelligent Connectivity:

No modifications are required when connecting a PSX-R₂ to partnering equipment. Both units intelligently adjust output and input parameters to suit. Simply power off both units, connect and power on; internal circuitry detects the connection and re-adjusts perfectly.

300VA Torodial:

A 300VA toroidal transformer with an enormous current delivery capability, forms the front end of the PSX-R₂. The 30,000 microfarad slit foil reservoir capacitors ensure that very low ESR and wide bandwidth are presented to the linear mode regulator stage that follows.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.

Compatible current models

Stream Xa, CD i

8₂ DAC, 8₂ DAC Qx, Pre₂ DAC, Pre₂ DAC Qx

Phono Signature, DAC XP Signature, X Power

PSX-R₂ Specifications

External power supply

Intelligent self-set-up

Highly regulated 300VA transformer

Dimensions (H x W x D) – 73 x 215 x 360 mm

Weight – 7kg
